

My Gas Quality, Environment, Health and Safety Policy

My Gas specialises in the supply of industrial, speciality and consumer gases to a broad spectrum of customers.

The management and employees of My Gas are committed to providing gas, related equipment and services of the highest quality and technological standard to ensure continued customer satisfaction. My Gas recognises the importance of protecting the environment without compromising the health and safety of its employees.

To realise this vision My Gas has implemented an Integrated Management System through which it will:

- aim to be a zero accident and incident operation
- adhere to rules, Codes of Conduct and applicable legislation
- maintain a high standard and quality in the production and delivery of My Gas products and services to its customers
- aim to remain profitable through innovation and product development
- commit to promoting environmental, health, safety and quality awareness amongst its employees
- manage its environmental impacts and commit to the prevention of pollution

The My Gas Integrated Management System will be continually reviewed to ensure its relevance to the organisation and to ensure continual improvement of its health, safety, environment and quality performance.

This policy is communicated to all My Gas employees and is available to the public on request. Implementation of this policy is a primary objective of the My Gas Managing Members and the responsibility of all employees. The policy will be reviewed annually and objectives and targets set to ensure that it remains relevant to the organisation.
